LegalOS, explained to a first-time user

Written from the point of view of a normal business owner who has never used the product before. Nothing here needs you to know programming or law.

1. The story in one page

Meet **Ramesh Kulkarni**. He runs Kulkarni Textiles, a mid-sized cloth business in Surat, Gujarat. He has about 80 employees, a GST number, and no lawyer on staff. A lawyer costs him 5,000 rupees an hour, so he only calls one when something has already gone wrong.

In a normal month Ramesh faces things like this:

1. A new customer sends him a 14-page **contract** and wants it signed by Friday. He reads the first page and signs.
2. A new **supplier** gives him a GST number on an invoice. He pays, hoping the number is real.
3. A brown envelope arrives from the GST department. It is a **legal notice**. It has a deadline somewhere inside, but he does not know where, or what happens if he misses it.
4. His accountant reminds him on the last day that a **filing** was due yesterday. There is a late fee.
5. An employee asks "how many leaves can I carry forward?" Ramesh knows it is written in the HR policy somewhere, but nobody can find the **document**.

LegalOS is one website that handles exactly those five problems. Each one is a **workspace**, which is just a tab on the left side of the screen:

Problem	Workspace tab	One-line promise
Contract to sign	**Contracts**	Read it before you sign it
Supplier to pay	**Vendors**	Check a supplier before you pay
Legal notice arrived	**Notices**	Understand it and reply in time
Filing deadlines	**Compliance**	Never miss a filing
Company papers	**Documents**	Ask your own papers a question

And one rule holds everything together: **every answer shows its evidence.** When the system flags a clause, it quotes the clause from your own file. When it gives a deadline, it shows where in the notice the date came from. When it does not know, it says "unknown" instead of guessing.

2. Getting in

1. Open `http://localhost:5173` in your browser (the product runs on your own machine during the demo).
2. You see a login page. Use the demo account:
   - Email: `ramesh@kulkarnitextiles.in`
   - Password: `Kulkarni@2026`
   - Or click **"or open it without signing in"** underneath the form. It drops you straight into Ramesh's company.
3. If you make a *new* account instead, the system first walks you through a three-step **onboarding**: company name, type of business, state, GSTIN (optional), number of employees, turnover, MSME status and which GST filing style you use. These answers drive the Compliance calendar later, so they matter.

What the screen looks like. There is a warm-coloured frame. On the left is a sidebar with seven entries: Home, Contracts, Vendors, Notices, Compliance, Documents, Settings. The middle is a white "sheet" where the actual work happens. At the top right of the sheet there is usually a **round button**: it opens a side panel with your history, your saved items, or your profile, depending on which workspace you are in. Press `Ctrl+\`

to collapse the sidebar into icons if you want more room.

3. Home: "where does my company stand?"

Home greets you by first name and shows four numbers on the right: overdue filings, filings due in 7 days, high-risk contracts, open notices. Below that, **"Needs your attention"** lists the six most urgent things across every workspace, colour-coded (peach = critical, amber = high, lavender = medium). Click any row and it takes you to the thing itself.

If you are brand new, a **Getting started** checklist appears with five steps and a "Try a sample" button next to most of them. That button loads a pre-made example so you can see a workspace working before you upload anything of your own.

Lower down is a day-by-day **activity log** ("Yesterday 4:12 pm: Reviewed contract X"). Think of it as the diary of what the system did for you.

4. Contracts: "Read it before you sign it"

What it is for

You upload a contract. The system reads it, finds every clause that could hurt you, quotes the clause, explains why it is a problem under Indian law, and suggests what to ask for instead.

How you use it

1. Click **Contracts**. The first thing you see is the upload area with the headline "Read it before you sign it."
2. Drop in a PDF, Word file, text file, or even a photo of a page (photos are read with OCR). There is one optional box: **"Which party are you?"** Type "Buyer" or "Tenant" or your company name. Leave it blank and it assumes you are Kulkarni Textiles.
3. Wait 20 to 60 seconds. The screen says what it is doing: reading, finding clauses, checking Indian law, scoring.
4. The **reading room** opens. The contract text is in the middle with risky clauses highlighted. On the right is the **verdict rail** with four tabs:
   - **Findings**: the list of problems, each with a severity (critical / high / medium / low), a word-for-word quote, the page number, why it matters, and a **Suggested change**. Click a finding and the contract scrolls to that clause and highlights it. There is a "Not in this contract" section too, for protections that *should* be there but are missing (for example, no cap on your liability).
   - **Score**: an overall risk level with the top drivers.
   - **Key terms**: parties, dates, money, notice periods, governing law, pulled out in a table.
   - **Ask**: a chat box. Ask "Can I leave early?" and the answer quotes the relevant clause.
5. Dates found in the contract (renewal, expiry, notice windows) are pushed to the Compliance calendar automatically.

Things a normal user should notice

- The system knows **what kind** of contract it is (lease, NDA, employment, supply, service, distribution, franchise, loan, software licence, partnership) and runs a different checklist for each.
- If the contract is very long, it reviews the first part up to a clause boundary and shows a line saying **"not reviewed below"**. It does not pretend to have read the whole thing.
- A long press on the round button at top right opens **Your contracts**, the history list, with a coloured dot per contract showing risk.

Pre-loaded examples in the demo company

File	What you will see
Employment offer letter (03)	5-year non-compete flagged **critical** (unenforceable in India under section 27 of the Contract Act), 6-month vs 30-day notice imbalance, retention of original certificates, Rs 3 lakh training bond
"Mutual" NDA (02)	Titled mutual but one-sided, Rs 25 lakh fixed penalty per breach, unlimited indemnity, 7-year term, Singapore law
SaaS subscription (04)	20% automatic price rise on renewal, vendor liability capped at 1 month's fees vs yours unlimited, 7-day data export window, Delaware arbitration
Machinery finance (05)	36% penal interest, five blank signed cheques, repossession without notice, one missed EMI is default
Distribution agreement (06)	Rs 2 crore minimum purchase with 30% shortfall penalty, you cannot exit for 3 years, "exclusive" territory that is not exclusive
Mumbai office lease (01)	36-month lock-in, 15% yearly escalation, deposit refund after 180 days with no interest (this one found fewer issues; avoid it on stage)

5. Vendors: "Check a supplier before you pay"

What it is for

Before you pay a new supplier, you type their GST number (GSTIN), PAN or Udyam number and the system tells you if it is real.

How you use it

1. Click **Vendors**. One big box in the middle: "GSTIN, PAN or Udyam number".
2. Start typing. The number is checked **as you type**: the 15 boxes turn green one by one as each part passes (state code, PAN inside it, entity code, the letter Z, the check digit). A typo turns a box red **before** you press Enter.
3. Press Enter or click Check. If a live GST registry connection is configured, you get a **verification card**: legal name, trade name, status (Active / Cancelled), registration date, state, business type. If there is no live connection, the screen says "Offline checks only" honestly rather than pretending.
4. Click **Save** and the supplier goes into **Your suppliers** (the round button at top right). Each saved supplier has a page with a risk verdict, reasons, linked contracts, and a **History of checks** with timestamps.

Numbers to try

Type this	Expect
`27AAACT2727Q1ZW`	Valid. Tata Motors Limited, Maharashtra, Active, registered 2017 (live registry)
`27AAACR5055K1Z7`	Valid. Reliance Industries Limited, Maharashtra, Active
`27AAACR5055K1Z8`	Last digit changed. **Check digit fails** on the spot, never sent to the registry. "Possible typo, re-verify."
`24ABCDE1234F1Z5`	Looks like a Gujarat number but the check character is wrong. Should say invalid / not found

6. Notices: "A legal notice arrived"

What it is for

A scary letter arrives: from the GST department, income tax, a supplier's lawyer, a landlord, a trademark owner, an ex-employee, a consumer. You upload it. The system tells you what it is, when you must reply, what the law says, what to do today, and writes the first draft of your reply.

How you use it

1. Click **Notices**. Upload the letter (PDF, photo, Word) or paste the text.
2. The first thing at the top is the **deadline strip**: received date, today, reply-by date, and days left. Under the reply-by date there is a small tick saying either **"found in the text"** (the date or the "30 days" wording was in the notice itself), **"statutory"** (the law sets this window; the section is cited), or **"unknown"** (the system refused to guess). The deadline is also added to the Compliance calendar.
3. Below that are four numbered steps:
   - **Step 1, What this is.** Type of notice, who sent it, what they want, how much money, in plain words.
   - **Step 2, What the law says.** The relevant Act and section, and "if you ignore it" consequences.
   - **Step 3, What to do now.** A checklist (gather invoices, reconcile returns, call your CA). Tick items; they stay ticked.
   - **Step 4, Your reply.** A draft letter that uses only facts from the notice. Anything it does not know is a **yellow blank** you click and fill in. You can type an instruction like "make it firmer" to redraft. Drafts are versioned. A **lawyer review gate** means it cannot be marked "final" until someone marks it as reviewed by a lawyer.
4. The round button at top right opens **Your notices**: every open notice sorted by urgency.

Fifteen kinds of notice it recognises

Cheque bounce, legal payment demand, GST notice, income-tax notice, labour/PF/ESI notice, MSME delayed payment, consumer complaint, trademark/copyright cease-and-desist, employment dispute, rent/eviction, court summons, defamation, contract breach, other regulatory, other.

Pre-loaded examples

File	What you will see
GST show-cause DRC-01 (07)	Rs 8,71,250 demand, section 73, reply by 13 Nov 2026 (16 days), "found in the text" tick, option to pay tax+interest and avoid penalty
Income tax 143(2) (08)	No money claimed, but a hard 7-day window, documents list
MSME delayed payment (09)	Rs 12,35,600, 3 days left, **critical**
Rent default and eviction (10)	Rs 2,55,000 arrears, reply by 4 Nov, vacate by 30 Nov (two dates, both shown)
Trademark cease and desist (11)	1 day left, **critical**
Consumer complaint (12)	Rs 1,95,000 claimed, 17 days
Employee termination dispute (13)	Rs 3,17,553 claimed, 1 day left, **critical**

7. Compliance: "Never miss a filing"

What it is for

A 12-month calendar of every government filing your company must do, built automatically from your company profile. Not a generic list: a private limited company in Gujarat with monthly GST and 50 to 199 employees gets a different calendar than a sole proprietor in Karnataka with quarterly GST.

How you use it

1. Click **Compliance**. If you have not filled your profile it says "Tell us about your company first."
2. Otherwise you see a **12-month strip** across the top. Click a month to see what is due that month, grouped by week.
3. A **Next up** box shows the single nearest deadline. An **Overdue** box (red) lists missed filings with the **late fee so far**, calculated per day.

4. Each filing shows: title (for example "GSTR-3B, summary return"), due date, the **source** (which Act or rule it comes from), and "If missed: ..." with the penalty. A few say *"being verified"* in italics, meaning the team has not yet confirmed the date against the latest notification. That is deliberate honesty.
5. Tick the checkbox to **mark as filed**. If you are new and many past filings show overdue, there is a "Mark as already filed" catch-up button to clear them in one go.
6. **Add your own reminder** for things the system does not track yet, such as an FSSAI licence renewal or a board meeting.
7. The round button at top right opens **Why these filings**: your profile facts with switches. Flip **GST composition scheme** on and watch GSTR-1 and GSTR-3B disappear while CMP-08 and GSTR-4 appear. Flip it back.

What is covered (28 rules)

GSTR-1 (monthly and quarterly), GSTR-3B (monthly and QRMP), PMT-06, GSTR-9, GSTR-9C, CMP-08, GSTR-4, TDS payment and return, EPF, ESI, Professional Tax (Karnataka only for now), advance tax, tax audit, income-tax returns (three variants), AGM, AOC-4, MGT-7, DPT-3, MSME Form 1, DIR-3 KYC, LLP Form 8 and 11, DPDP Act readiness.

What it openly says it does not cover yet

Professional Tax in other states, Shops and Establishment renewal, Labour Welfare Fund, ADT-1, One Person Company filings, licences like FSSAI and fire (upload the certificate in Documents and its expiry lands here), TCS returns and e-invoicing.

8. Documents: "Ask your own papers"

What it is for

A ChatGPT-style chat, but it only answers from the documents your company uploaded, and every sentence has a numbered citation you can click to see the exact passage.

How you use it

1. Click **Documents**. In the middle: "What do you want to know?" and a chat box. The round button at top right opens the **Library**: your documents grouped into **collections** (HR, Finance, Safety, Board, and so on) and your past chats.
2. **Add a document** (button in the Library). Pick or create a collection. The file is read, split into passages, indexed, and summarised. Scans and Hindi documents work. If the document has an expiry date (an insurance policy, a price list) it is detected and sent to the Compliance calendar.
3. Pick a **scope** from the small dropdown next to the chat box: "All documents" or one collection. Keeping the scope narrow gives sharper answers.
4. Ask in English, Hindi, or Hinglish. The answer streams in with **[1] [2]** chips. Click a chip: a panel opens showing the passage with the quoted words highlighted and a green tick "found word for word", or an amber question mark if the quote could not be matched. A **Confidence %** at the bottom of each answer is the share of quotes that were verified.
5. Ask follow-ups in the same chat. Rename or delete chats from the Library.

Three kinds of question it understands

- **Lookup**: "How many casual leaves do I get?" (searches and quotes)
- **Overview**: "Summarise the leave policy" or "What documents do I have?" (answers from the document profiles)
- **Chit-chat**: "Hi, what can you do?" (answered with no AI call)

Pre-loaded documents and good questions

Document	Collection	Ask
Leave and attendance policy (14)	HR	How many days of earned leave can I carry forward? What happens on my 4th late mark in a month?
Supplier onboarding SOP (15)	Finance	Who must approve a purchase order of Rs 12 lakh? What is the payment term for an MSME vendor?
Factory safety manual, in Hindi (16)	Safety	`accident report kitne ghante ke andar karna hai?` (answer: 24 ghante) Fire drill kitni baar hoti hai?
Price list FY 2026-27 (17)	Sales	What is the price and MOQ of the 6205-2RS bearing? Until when is this price list valid?
Board resolution on bank authority (18)	Board	Who is authorised to sign cheques and up to what amount? Can one director alone sign a Rs 8 lakh payment?
Insurance policy schedule (19)	Finance	When does the policy expire? Within how many hours must a loss be reported? Is earthquake fire covered?

9. Settings

Opens as a pop-up with three sections. **Company** shows the profile. **System** shows four traffic lights: Database, Document search, AI analysis (with the model name), and GST registry lookups ("Live" or "Offline checks only"). **Account** shows who is signed in. If something in a demo is not working, this is the first place to look.

10. The one thing to remember

LegalOS is **not a lawyer** and says so on screen. It is decision support. Every finding carries a quote, every deadline carries a source, every reply needs a lawyer's tick before it is final. What it saves you is the first two hours of reading, searching and panicking, so that the one hour you do buy from a lawyer is spent on the real question.

What to test, and what to type: a first-time user's checklist

Companion to USER_GUIDE_LAYMAN.md. Do these in order; each block is 5 to 10 minutes. "Pass" means what you see matches the "Expect" column. Note anything else as a bug.

All test files are in `docs/testdata/` (contracts/, notices/, documents/). The demo company already has them loaded; re-uploading costs AI quota (about 2 calls per file, 20 calls per key per day), so prefer the pre-loaded copies and upload fresh files only when a test says so.

0. Before anything

#	Do	Expect
0.1	Open http://localhost:5173	Login page loads, no console errors
0.2	Click "or open it without signing in"	Lands on Home as Ramesh, Kulkarni Textiles
0.3	Settings (sidebar) > System	Database: Working. Document search: Working. AI analysis: Working with a model name. GST registry: Live (or "Offline checks only", note which)
0.4	Open http://localhost:8010/health/llm in a new tab	JSON shows keys and how many calls are left. If all exhausted, stop and add keys before testing uploads
0.5	Press Ctrl+\ twice	Sidebar collapses to icons and expands again
0.6	Toggle the theme button (top strip)	Dark mode, everything still readable, toggle back

1. Home

#	Do	Expect
1.1	Look at the four numbers on the right	They match what you later count in Compliance (overdue), Contracts (high risk) and Notices (open)
1.2	Click a row under "Needs your attention"	Goes to that exact contract / notice / filing
1.3	Click "Calendar" link in Next deadlines	Opens Compliance
1.4	Sign out, create a new account (any name, company "Test Pvt Ltd")	Onboarding wizard, 3 steps. Home then shows "Getting started" at 20%
1.5	In Getting started, click "Try a sample" next to Contract	A sample contract loads and opens. Progress bar moves
1.6	Sign back in as Ramesh	His data is intact, nothing from Test Pvt Ltd leaks in

2. Contracts

Pre-loaded (no AI cost)

#	Do	Expect
2.1	Contracts > round button > open "Employment offer letter" (03)	Verdict rail says **High** risk. A **critical** finding: 5-year post-employment non-compete
2.2	Click that finding	Contract text scrolls and highlights clause 4.1. Explanation mentions section 27, Indian Contract Act. "Suggested change" opens
2.3	Click "Unbalanced notice period"	Highlights 6 months (employee) vs 30 days (employer)

#	Do	Expect
2.4	Click "Retention of original educational certificates"	Highlights clause 11.2
2.5	Filter by severity (chips above the list)	List narrows correctly
2.6	Key terms tab	Parties, CTC, notice periods, governing law filled in. Nothing invented (compare with the file)
2.7	Ask tab: `Can I take a job with a competitor after I leave?`	Answer quotes clause 4.1 and mentions the 5-year restriction
2.8	Ask tab: `What is my salary?`	Answer quotes the CTC figure from the letter
2.9	Ask tab: `Does this contract mention a pension?`	Should say it is not in the contract, not invent one
2.10	Open SaaS (04)	Finds 20% renewal increase, 1-month liability cap vs unlimited, Delaware arbitration, 7-day data export
2.11	Open Machinery finance (05)	4 critical: 36% penal interest, blank cheques, repossession without notice, acceleration
2.12	Open NDA (02)	Flags that "Mutual" is one-sided, Rs 25 lakh per breach, unlimited indemnity, Singapore law
2.13	Open Distribution (06)	Rs 2 crore minimum, 30% shortfall penalty, no exit for 3 years, pan-India non-compete
2.14	Open Lease (01)	Known weak spot: only about 3 findings. Note what it misses from: 36-month lock-in, 15% escalation, 180-day deposit, 15-day landlord exit, all repairs on tenant
2.15	Three-dot menu > Delete on any contract, then cancel	Confirm dialog appears, cancel keeps it

Fresh upload (costs AI calls)

#	Do	Expect
2.16	Upload `contracts/01_office_lease_mumbai.txt` again, "Which party are you?" = `Licensee`	Progress text: reading, finding clauses, checking Indian law, scoring. Finishes in 20 to 60 s
2.17	Upload a photo (take a phone picture of one printed page)	OCR path runs, text appears, at least one finding or an honest "nothing significant"
2.18	Upload a 40+ page PDF (any long agreement)	Warning banner "Long contract: only part of it was reviewed" and a visible "not reviewed below" line in the text
2.19	Upload a non-contract (a restaurant menu PDF)	Type "other", few or no findings, no crash
2.20	Upload an empty .txt file	Friendly error, not a stack trace
2.21	Upload a 25 MB file	Rejected with a clear size message
2.22	Upload the same file twice	Two separate entries, neither overwrites the other
2.23	After upload, go to Compliance	Any dates found (expiry, renewal) appear as reminders

3. Vendors

#	Type	Expect
3.1	`27AAACT2727Q1ZW` slowly, one character at a time	Boxes turn green one by one. On Enter: Tata Motors Limited, Maharashtra, Active, registered 2017
3.2	`27AAACR5055K1Z7`	Reliance Industries Limited, Active

#	Type	Expect
3.3	`27AAACR5055K1Z8`	Last box turns red before Enter. Message about check digit / possible typo. Registry is **not** called
3.4	`24ABCDE1234F1Z5`	Check character wrong, flagged invalid
3.5	`27AAACT2727Q1Z` (14 chars)	"Too short" style message, Check button disabled
3.6	`AAACT2727Q` (a PAN only)	Recognised as PAN, structure check passes, says registry lookup needs a GSTIN
3.7	`UDYAM-MH-26-0012345`	Recognised as Udyam number, format valid
3.8	lower case `27aaact2727q1zw`	Auto-uppercased
3.9	`99AAACT2727Q1ZW`	State code 99 invalid
3.10	paste with spaces `27 AAACT 2727 Q1ZW`	Either cleaned or rejected clearly, not half-parsed
3.11	Save Tata Motors with name "Tata Motors Ltd"	Appears in Your suppliers. Open it: History of checks has one row
3.12	Check the same GSTIN again, then open the supplier	History has two rows with timestamps
3.13	Edit supplier > set MSME status = registered	Save re-runs checks; risk reasons update
3.14	Open a contract whose counterparty is a saved supplier	Supplier card shows on the contract and the contract shows under the supplier's linked records
3.15	Turn off the live registry (clear GST_API_PROVIDER in .env, restart backend) and check 3.1 again	Card says "Offline checks only" / "not checked", never shows a fake Active
3.16	Delete the supplier	Confirm dialog, then gone from list

4. Notices

Pre-loaded

#	Do	Expect
4.1	Notices > round button > GST show-cause (07)	Deadline strip: received 14 Oct 2026, reply by 13 Nov 2026, days-left counter correct for today's date. Green "found in the text" tick
4.2	Step 1	GST notice, Form DRC-01, section 73, Rs 8,71,250 total (tax 6,84,500 + interest 1,18,300 + penalty 68,450), personal hearing 24 Nov
4.3	Step 2	Mentions section 73(8) option (pay tax + interest by deadline, no penalty) and "if you ignore it" (order passed without hearing)
4.4	Step 3: tick two checklist items, reload the page	Ticks persist; "2 of 5 done"
4.5	Step 4: click a yellow blank	Cursor jumps to it; fill in a value; blank disappears
4.6	Type "make it shorter" in the redraft box	A new version appears in the version dropdown; old version still selectable
4.7	Try to mark the reply final before lawyer review	Blocked, with a message
4.8	Mark "Reviewed by lawyer", then final	Step 4 shows "Reviewed by lawyer" and done tick
4.9	Compliance tab	"Reply to GST notice" reminder dated 13 Nov exists
4.10	Open MSME demand (09)	Rs 12,35,600, critical colour, mentions 45-day rule (s.15 MSMED), 75% deposit (s.19)
4.11	Open Trademark (11)	1 day left, critical, Trade Marks Act s.29, no statutory reply window so deadline comes from the letter's "7 days"

#	Do	Expect
4.12	Open Rent default (10)	Both dates reported: pay by 4 Nov and vacate by 30 Nov. Two bounced cheque numbers mentioned
4.13	Open Income tax 143(2) (08)	No amount claimed (should say so), 7-day window, s.144 and s.271(1)(b) consequences
4.14	Open Employee dispute (13)	Rs 3,17,553 breakdown, s.25F Industrial Disputes Act
4.15	Open Consumer (12)	Rs 85,000 + 1,00,000 + 10,000; Consumer Protection Act 2019
4.16	Side panel sort	Most urgent (fewest days left) at the top

Fresh upload

#	Do	Expect
4.17	Paste the text of `docs/demo/02_cheque_bounce_notice.txt`	Type cheque_bounce, deadline marked **statutory** (15 days, s.138 NI Act cited)
4.18	Paste a notice with the date removed	Deadline shows **unknown**, not a guessed date. Deadline strip explains why
4.19	Paste a notice that says "reply within 30 days" but has no date	Deadline unknown or "30 days from receipt, enter received date", not invented
4.20	Upload a photo of a printed notice	OCR runs, type detected
4.21	Paste plain gibberish ("asdf qwer")	Type "other", honest "could not understand", no crash
4.22	Paste a notice written in Hindi	Type detected, summary readable, deadline found if present
4.23	While analysis is running, navigate away and back	Progress continues; result appears
4.24	Delete a notice	Its calendar reminder also disappears from Compliance

5. Compliance

#	Do	Expect
5.1	Open Compliance	12-month strip, Next up box, Overdue box with at least one GSTR-3B and a late fee amount
5.2	Late fee sanity: GSTR-3B is Rs 50/day (Rs 20/day nil return), capped. Compare shown amount with days overdue	Matches
5.3	Click each month	Filings grouped by week; months with nothing say "Nothing due in <month>"
5.4	Hover a filing's source	Full Act / rule reference shown
5.5	Find any italic "being verified"	Tooltip explains the date is not yet confirmed
5.6	Tick "Mark as filed" on one item, reload	Stays ticked. Undo works
5.7	Home	Overdue count dropped by one
5.8	"Mark as already filed" catch-up (if 2+ overdue)	Confirm dialog with count; all overdue cleared in one go
5.9	Add your own reminder: "Renew FSSAI licence", date next month	Appears in that month; can be deleted
5.10	Round button > Why these filings > Edit > switch **GST composition scheme** ON	GSTR-1 and GSTR-3B vanish; CMP-08 (quarterly) and GSTR-4 (annual) appear
5.11	Switch it back OFF	Original calendar returns; your "filed" ticks and custom reminders are still there (the sync must not delete user data)

#	Do	Expect
5.12	Change state to Karnataka	Professional Tax (Karnataka) appears. Change to Maharashtra: it disappears and nothing else breaks
5.13	Change entity type to LLP	AOC-4 / MGT-7 / AGM go; LLP Form 8 and Form 11 appear
5.14	Change employees to under 10	EPF / ESI rules disappear (ESI threshold 10, EPF 20)
5.15	Set GST filing to Quarterly (QRMP)	GSTR-1 quarterly and PMT-06 monthly appear instead of monthly GSTR-1
5.16	Click Refresh (rebuild from profile) twice fast	No duplicate filings
5.17	Read the "not covered yet" list in the panel	Lists Professional Tax other states, Shops and Establishment, LWF, ADT-1, OPC, licences, TCS

6. Documents

Questions on the pre-loaded set (scope in brackets). Each costs 2 AI calls.

#	Scope	Type	Expect
6.1	HR	`How many casual leaves do I get in a year?`	8 days, citation chip opens the leave policy, green tick "found word for word", confidence near 100%
6.2	HR	`How many days of earned leave can I carry forward?`	30 (45 for plant staff)
6.3	HR	`What happens if I am late for the fourth time in a month?`	Half-day CL deducted
6.4	HR	`Can plant staff work from home?`	No, with the WFH clause quoted
6.5	HR	`summarise the leave policy`	Overview answer: CL/SL/EL, WFH, maternity 26 weeks, paternity 5 days, still cited
6.6	Finance	`Who must approve a purchase order of Rs 12 lakh?`	GM Operations (Rs 5 lakh to Rs 25 lakh band)
6.7	Finance	`What is the payment term for an MSME vendor and what law says so?`	30 days, never beyond 45, MSMED Act s.15
6.8	Finance	`Which documents does a new supplier have to submit?`	PAN, GST certificate, Udyam, cancelled cheque, etc.
6.9	Safety	`accident report kitne ghante ke andar karna hai?`	Hindi answer "24 ghante ke bheetar", chip opens Hindi passage, verified
6.10	Safety	`दुर्घटना की रपोर्ट कतिने घंटे के भीतर देनी होती है?`	Same answer in Devanagari
6.11	Safety	`Within how many hours must an accident be reported?` (English)	24 hours, plus 12-hour written notice to Inspector for serious accidents
6.12	Safety	`fire drill kitni baar hoti hai aur agli kab hai?`	Every 3 months; next by 14 Nov 2026
6.13	Safety	`welding ke liye kaunsa PPE zaroori hai?`	Lists PPE for welding from the manual
6.14	Sales	`What is the price and MOQ of the 6205-2RS bearing?`	Rs 96 per piece, MOQ 100 (SIP-BRG-101)
6.15	Sales	`What discount do I get on an invoice of Rs 6 lakh?`	5% (from Rs 5 lakh), plus whether lubricants are included
6.16	Sales	`Until when is this price list valid?`	31 March 2027
6.17	Board	`Who is authorised to sign cheques and up to what amount?`	Patel and Shah; single up to Rs 5 lakh; joint up to Rs 50 lakh; 4 citations
6.18	Board	`Can one director alone sign a Rs 8 lakh payment?`	No, joint signature needed above Rs 5 lakh

#	Scope	Type	Expect
6.19	Board	`Can the directors take a loan under this resolution?`	No, borrowing excluded (s.179(3))
6.20	Finance	`When does the insurance policy expire?`	9 Jan 2027, no auto-renewal. Also check Compliance shows this expiry
6.21	Finance	`Within how many hours must a loss be reported to the insurer?`	48 hours; claim documents within 15 days
6.22	Finance	`Is fire caused by an earthquake covered?`	No, earthquake excluded
6.23	All	`accident report kitne ghante ke andar karna hai?`	May return both 24 h (safety manual) and 48 h (insurance). Acceptable if both cited; a bug if it merges them into one number
6.24	All	`What documents do I have?`	Lists all six with one line each
6.25	All	`What is the CEO's salary?`	"Not found in your documents", no invented number
6.26	All	`hi` / `what can you do?`	Instant friendly reply, no citations, no AI quota used
6.27	All	`Compare the notice period in the HR policy with the offer letter`	Offer letter is in Contracts, not Documents: should answer only from the HR policy and say the other is not available here

Behaviour tests

#	Do	Expect
6.28	Click a citation chip	Bottom sheet "Where this comes from", highlighted quote, green tick
6.29	Find an answer with an amber question mark	Confidence below 100 and the chip says quote could not be matched
6.30	Click Stop while an answer streams	Stops cleanly, partial answer kept
6.31	Ask a follow-up `and for plant staff?` after 6.2	Uses chat context, answers 45 days
6.32	Rename a chat, delete a chat	Documents remain
6.33	Add a new document into a new collection "Legal"	Processing steps show; green dot when ready; summary and suggested questions appear
6.34	Upload a scanned PDF	Paged OCR; searchable afterwards
6.35	Restart the backend while a document is processing	It resumes and finishes (automatic resume)
6.36	Delete a document	Its expiry reminder disappears from Compliance; its chunks no longer appear in answers

7. Cross-workspace and robustness

#	Do	Expect
7.1	Ctrl+K (command palette) type "GST"	Jumps to matching notice / filing / page
7.2	Notifications bell	Lists the same urgent items as Home
7.3	Resize to phone width	Side panels become sheets; nothing overflows
7.4	Exhaust the AI quota (or set a wrong key) and upload a contract	Screen says the AI is rate-limited / unavailable in plain words. Never a "risk 0" or blank summary
7.5	Stop the Qdrant container, ask a Documents question	Settings > System shows Document search Down; chat gives a clear error

#	Do	Expect
7.6	Open any item URL from another company's account	404 / not found, not the other company's data
7.7	Audit: Settings > Account or activity log	Every upload, delete, mark-filed appears with time
7.8	Run the backend tests	`docker compose exec backend python -m pytest` reports about 179 passed
7.9	Run the retrieval eval	`docker compose exec backend python -m app.workspaces.knowledge_hub.eval.run_eval` reports hit@6 = 16/16

8. Known weak spots to probe (from the team's own notes)

- Lease contract (01) under-finds. Try it and list what it missed.
- GST notice (07) uses s.73; for FY 2024-25 the correct section is s.74A. Does the system mention this?
- Income-tax 143(2) (08) may be time-barred. Does the system raise the service window?
- Professional Tax exists only for Karnataka. Gujarat (the demo company's state) gets none.
- Vendor registry depends on paid API keys. Without them, confirm nothing is shown as "live".
- Gemini free tier: 20 calls per model per key per day. Plan the number of fresh uploads accordingly.
- The old Gemini key is still in git history (commit ad78430) and should be revoked.
